## Introduction

- GTI invests in the development of green technologies and companies which focus on converting environmental problems into solid returns for investors and the environment.
- GTI is strategically positioned to become a forerunner of Canadian companies trading carbon credits.
- GTI is managed by environmentally concerned professionals with years of experience in the financial sector.
- GTI is able to provide a 10% annual return plus profit sharing on investment proceeds.

## Current Investment Focus: InvestCo

- An international waste-to-energy company that specializes in landfill reclamation and power production and distribution
- Wholly owns a Proprietary Waste To Energy (WTE) technology with a 25 year operational history
- Wholly owns capital equipment and certifications
- A Clean Development Mechanism (CDM) project developer, operator and financier
- Produces electricity, hydrogen, pure water, and carbon credits
- Has highly lucrative revenue streams from tippage fees, energy production, and carbon credit sales
- Certified and licensed by:
  - Environmental Protection Agency (EPA) in all nine regions of the US
  - Canadian Ministry of Environment (MOE)
  - Canadian Standards Association (CSA)
  - ISO 14064-2 – certified to issue carbon credits
  - Registered methodology with the Canadian GHG clean air program

## Environmentally Conscious

- Combats global greenhouse gas production
- provides power to communities living in darkness due to lack of reliable electricity
- reclaims waste repositories

## Returns

- Fixed annual rate of return of 10%
- Up to 50% share of investment proceeds

## Summary

- GTI has secured exclusive rights from InvestCo to market its carbon program and technology to individual retail investors
- Providing investors a solid, high-yield investment in green technologies
- Addressing global issues while offering significant upside potential for investors
