Date: April 21/10

Company: Ecometals (EC)

Buy/Sell: Buy

Price: 0.27

Industry: gold

Shares O/S: 60 million warrants

Reason: Drilling for gold 600m away from the FDN deposit found by ARU who was bought out by Kinross. Missed on first four holes but I think they are proving up the structure. If condor sale goes through for 9 million they will have a good cash position to drill out the structure.
